

LUSHPROTEIN

Turning First-Time Buyers into Repeat Customers

SMU ISSS603 · April 2026

About LushProtein

Who We Are

A leading **DTC sports nutrition brand** founded in 2013, focusing on clean and effective formulations.

Core Markets

Majorly active present in **Singapore & Malaysia**. Starting presence in **Hong Kong, Australia and Indonesia**

Approach

Digital-first strategy paired with high-impact community events like Hyrox and pop-ups.

Hero Products

Lean Protein – Protein fortified with Prebiotics and Probiotics. Bubble tea inspired flavours

Clear Protein – Refreshing and fruity clear protein drink

Collagen Glow – Pure peptides best for hair, skin and nails

The Retention Problem

THE CHALLENGE

High Acquisition, Low Retention

We successfully acquire new customers every month, but a significant majority fail to transition into loyal advocates.

25%

Repeat Rate

Current baseline

75%

Single Purchase

Do not return

Why This Matters

The Critical Window

Products last ~2 to 3 months

If customers do not return in that window, they are effectively lost.

Paid acquisition is expensive

High CAC requires multiple orders to break even.

Retention drives LTV

Loyal customers are the backbone of profitability.

LTV determines growth

Higher LTV allows for aggressive scaling.

What We Already See

Initial Insights

- **Subscriptions** retain significantly better
- **Multi-product buyers** show much higher LTV
- **60-Day Window:** Most 2nd purchases happen here

The Knowledge Gap

What we still do not know:

- Which levers to **prioritise** first
- The **why** behind these behaviors
- Concrete **next steps** for experiments

What We Want to Understand

1. Retention Cohorts

Identifying the specific traits that distinguish customers who come back from those who remain one-time buyers.

2. Key Repeat Drivers

- **Product:** High-stickiness SKUs (e.g., Lean/Clear)
- **Channel:** Website vs. Marketplace performance
- **Discounts:** Impact of promotions on long-term LTV

3. Churn Milestones

Mapping the exact point in the lifecycle where customer engagement drops off, typically around the 2-3 month mark.

What Success Looks Like

A STRONG ANSWER TELLS US:

- **Customer Priority:** Which cohorts are worth the highest investment
- **Key Behaviors:** What actions trigger long-term loyalty
- **Structural Change:** What we must evolve in our model

Beyond Insights
Decisions

Focus Area

Key Focus

Increasing second purchase within 90 days

Why This Matters

Directly impacts retention

- Shortening the gap between orders cements the habit.

Directly impacts LTV

- The second purchase is the single biggest predictor of long-term value.

Can be tested quickly

- 90-day cycles allow for rapid iteration and experimentation.

What We Want From You

THE DELIVERABLES

Key Requirements

- **Clear Hypotheses:** Specific, data-backed "If/Then" statements explaining customer behavior.
- **Prioritised Levers:** Identifying which strategic areas will drive the highest impact for retention.
- **2-3 Lean Experiments:** Actionable tests we can realistically launch within **30-60 days**.

Operating Context

We are a **lean team**. Every resource counts, so your focus on **prioritisation** is what makes these insights actionable for us.

If you had to bet on just **two things
we should do next, what would
they be?**

"This is the lens I would like you to approach this
problem with."
